

After 50 years of proven performance, the Watermaster Floating Pump is the lightest and fastest pump on the market.

**Powerful:** Pumps approximately 840 gallons per minute through a 6"-diameter discharge hose.

**Adaptable:** Large inlets and specially designed 12.5" impeller handles almost any liquid from water to sludge with no need for electricity or auxiliary tractor power.

**Efficient:** 5.5 horsepower, heavy-duty industrial 4 cycle gas engine.

**Easy to use:** Set in the water, unroll hose, pull cord, and walk away. Weighs only 80 lbs.!

## Use in a variety of applications:

- ✓ Remove floodwater from buildings & basements
- ✓ Drain low spots in farm fields & ditches
- ✓ Remove excess water from construction sites & golf courses
- ✓ Use to pump water for fire suppression
- ✓ Use for water aeration and irrigation

## Package includes:

Watermaster Pump with 5.5 HP engine and 6" dia. x 400' hose with connector
