

Agri Drain Smart Drainage System®

Add manual, automated & remote control capabilities to Agri Drain's Water Level Control Structures in pipe sizes up to 12"-diameter.

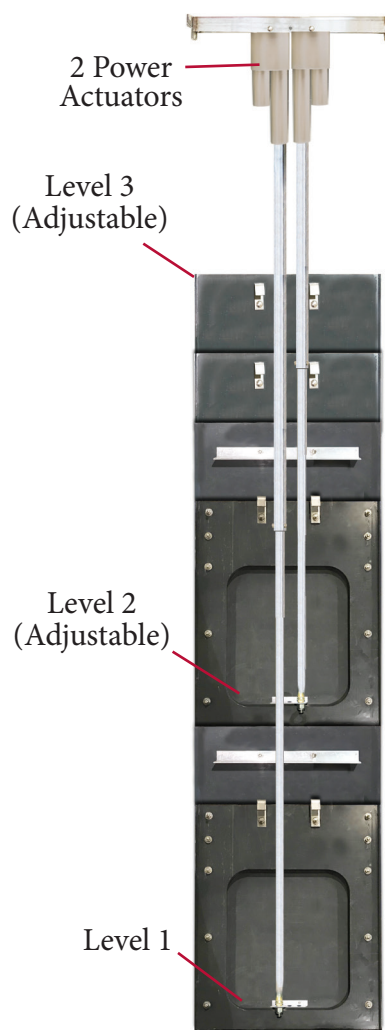

2 & 3 Level Automated Valves

Installing 1 or 2 slide gate valves with a power actuator and a programmable controller into Agri Drain's Inline Water Level Control Structure™ allows you to program your system on-site to automatically open and close valves to drain or retain water in a pond, wetland, surface or subsurface drainage system on a year-round schedule.

2 Level Valve

3 Level Valve

Power Control Unit

US Patent No. 6,715,508 B2
 US Patent No. 6,786,234 B2
 Canadian Patent No. 2,403,456
 Canadian Patent No. 2,466,976

2 Level Valve

6"/8" 2 Level Automated Valve \$1,975.00*

10"/12" 2 Level Automated Valve \$2,025.00*

Package includes: slide gate valve, power actuator, programmable controller, & solar power unit.

3 Level Valve

6"/8" 3 Level Automated Valve \$2,495.00*

10"/12" 3 Level Automated Valve \$2,595.00*

Package includes: 2 slide gate valves, 2 power actuators, programmable controller, & solar power unit.

***Price does not include water level control structure or freight.**
 Structures are intended for gravity flow: Low pressure and some seepage will occur.
