## Standard Flap Gates

Keep damaging water out of drainage systems.

- ◆ Constructed with quality materials and has a special finish for longer life.
- ◆ Flaps for mild steel Flap Gates are galvanized up to FG15 size. Flaps for FG15P and larger are powder coated. Mild steel attachment brackets have a durable powder coat finish. 304 Stainless Steel Flap Gates are not powder coated.
- ◆ Flap Gates do not have a gasket and are not watertight.
- ◆ Flap should sit flush against the pipe, not the band, to ensure optimal performance.

*(Please specify type of pipe when ordering.)*

This special Flap Gate is designed with an extra-wide band that catches several corrugations on corrugated plastic tubing.

Standard Flap Gates fit all PVC, CMP, and other similar types of pipe.

Hinged arm attaches easily with a single bolt.

**(Specs on next page.)**

<b>Standard Flap Gates for PVC, CMP, and Similar Types of Pipe</b>
