

Multi-Level Automated Remote-Control Valve

Add multi-level, automated, remote-control capabilities to Agri Drain's Inline Water Level Control Structures[™] in pipe sizes up to 18"-diameter.

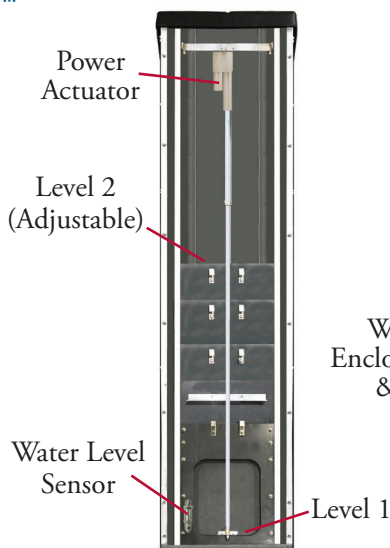

Features:

- PVC Slide Gate Valve. (Components slide into tracks of an Inline structure.)
- Power actuator to open and close the slide gate valve.
- Water level sensor to monitor water level in the structure.
- Solar panel and battery to provide power to the system.
- Programmable controller with cellular/cloud-based communications.
- Weather-proof enclosure.

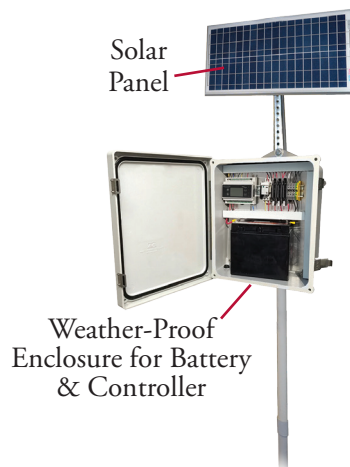

Smart Drainage Site Options:

- Monitor and manage your system remotely.
- Open/close valve on demand or automatically based on desired set-points and a year-round schedule.
- Smart Drainage Site dashboard displays water level, battery condition, valve position, and set-points.

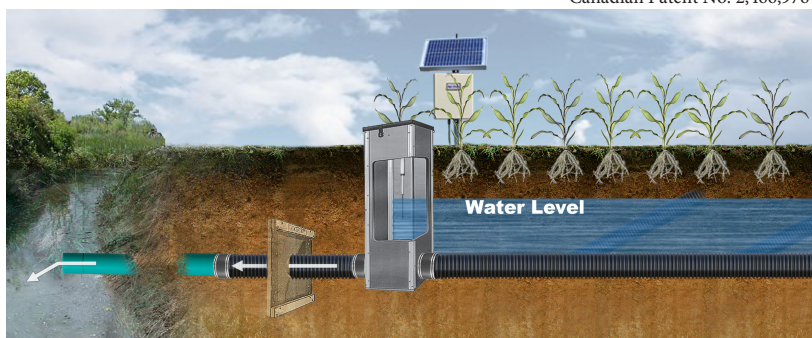

Multi-Level Valve

Power/Control Unit
