

Agri Drain Smart Drainage System®

Add manual, automated & remote control capabilities to Agri Drain's Water Level Control Structures in pipe sizes up to 12"-diameter.

Multi-Level Automated Remote-Control Valve

Installing a slide gate valve with a power actuator and a cellular-accessible controller into Agri Drain's Inline Water Level Control Structure™ allows you to remotely access your system with an online device (cell phone, tablet, laptop). Our Smart Drainage Site and Dashboard Display allows you to remotely program your system to automatically control water levels based on specific set points and a year-round schedule.

Multi-Level Valve

Power Control Unit

- 6"/8" Multi-Level Automated Remote-Control Valve** \$4,885.00*
- 10"/12" Multi-Level Automated Remote-Control Valve** \$4,935.00*

Package includes: slide gate valve, power actuator, remotely programmable controller, water level sensor, & solar power unit.
Additional options include battery status, valve position, rain gauge, soil moisture, and flow measurements.

***Price does not include water level control structure, data package, system configuration, or freight.**
Structures are intended for gravity flow: Low pressure and some seepage will occur.
